PROFILE

Enthusiastic and detail-oriented **Python Full Stack Developer** with a solid foundation in both front-end and back-end technologies. Proficient in **Python, Django, Flask, Rest API, HTML, CSS**. Skilled in designing responsive web applications and working with databases such as **MySQL, SQLITE**, and **MongoDB**. Passionate about clean code, problem-solving, and learning new technologies to build scalable, user-friendly solutions. Seeking to apply technical and collaborative skills in a dynamic development environment.

SKILLS

Languages & Frameworks: Python, Django, Flask, JavaScript, React, Rest API, JSON

Databases: MongoDB, MySQL, SQLITE, PostgreSQL

Dev Tools & Platforms: Git, GitHub, Postman

Authentication & Payments: Auth0, Razorpay, JWT

Frontend Tools: Bootstrap, Tailwind CSS, HTML5, CSS

PROFESSIONAL EXPERIENCE

PYTHON FULL STACK Developer Intern

Present

Synnefo Solutions

Ernakulam, kerala

- Built internal web tools and client-facing applications using Python and Django
- Collaborated with design and QA teams to deliver pixel-perfect, bug-free UI
- Focused on **clean, efficient, and maintainable code** to ensure optimal performance.

PROJECTS

▪ PICGRAM : instagram-Clone

Tools used: Python, Django, HTML, CSS, Bootstrap

Repository Link : github.com/unnikrish1011/instagram-clone

- Developed an **Instagram clone web application** using **Django** to replicate core social media functionalities.
- Implemented features such as user authentication and authorization using Django's **built-in auth** system.
- Utilized Django **ORM** for database operations and integrated media handling for image uploads.
- Emphasized clean architecture, modular code design, and a responsive interface using **HTML, CSS, Bootstrap**.

▪ BOOK MY SHOW-Clone (Host Link)

Tools used: Python, Django, HTML, CSS, Bootstrap

Repository Link: github.com/unnikrish1011/book-my-show-clone

- Developed a **BookMyShow clone web application** using **Django** to replicate the core features of an online movie ticket booking platform.
- Implemented **user registration and authentication** using Django's built-in auth system.
- Used Django's **Model-View-Template (MVT)** architecture and **ORM** for efficient database management.

▪ **GALLERY VAULT**

Tools used: Python, Django, HTML, CSS

Repository Link : [github.com/unni-web/Gallery Vault](https://github.com/unni-web/Gallery-Vault)

- Developed a **photo gallery web application** named Gallery Walt using **Django** to allow users to upload, organize, and view images efficiently.
- Implemented **user authentication** and **profile management** using Django's built-in auth system.
- Designed a clean interface where users can create albums, upload photos, and browse galleries by category or user.
- Utilized Django's **Model-View-Template (MVT)** architecture and **ORM** for managing image data and relationships effectively

▪ **PHONEVERSE E-Commerce**

Tools used: Python, Django, HTML, CSS , Bootstrap , Razorpay

Repository Link : [https://github.com/unni-web/Phoneverse ecommerce](https://github.com/unni-web/Phoneverse-ecommerce)

- **Phoneverse** is an **e-commerce web application** for buying premium pre-owned smartphones.
- Users can browse phones by brand and category with detailed product descriptions.
- The platform includes user registration and secure authentication.
- Users can add products to cart and **wishlist** for easy shopping.
- Dynamic price handling and cart management are implemented.
- Phoneverse provides a **responsive** and user-friendly shopping experience.
