PROFILE

Enthusiastic and detail-oriented **Python Full Stack Developer** with a solid foundation in both front-end and back-end technologies. Proficient in **Python, Django, Flask, Rest API, HTML, CSS**. Skilled in designing responsive web applications and working with databases such as **MySQL, SQLITE**, and **MongoDB**. Passionate about clean code, problem-solving, and learning new technologies to build scalable, user-friendly solutions. Seeking to apply technical and collaborative skills in a dynamic development environment.

SKILLS

Languages & Frameworks: Python, Django, Flask, JavaScript, React, Rest API, JSON

Databases: MongoDB, MySQL, SQLITE, PostgresSQL

Dev Tools & Platforms: Git, GitHub, Postman

Authentication & Payments: Auth0, Razorpay, JWT

Frontend Tools: Bootstrap, Tailwind CSS, HTML5, CSS

PROFESSIONAL EXPERIENCE

PYTHON FULL STACK Developer Intern

06/2025 - 02/2026

Synnefo Solutions

Ernakulam, kerala

- Built internal web tools and client-facing applications using Python and Django
- Collaborated with design and QA teams to deliver pixel-perfect, bug-free UI
- Focused on **clean, efficient, and maintainable code** to ensure optimal performance.

PROJECTS

■ HOSTEL-MATE

Tools used: Python, Django, HTML, CSS, Bootstrap, Razorpay, JavaScript

Repository Link : github.com/unnikrish1011/HostelMate

- Developed **HostelMate**, a full-stack hostel booking web application using **Django**.
- Implemented **user & owner role-based authentication system** with secure login and access control.
- Built complete **hostel booking workflow** including request submission, approval, and payment tracking.
- Integrated **real-time chat system** between users and hostel owners using **Django** models and **AJAX**.

■ PHONEVERSE E-Commerce

Tools used: Python, Django, HTML, CSS, Bootstrap, Razorpay

Repository Link : https://github.com/unnikrish1011/Phoneverse_ecommerce

- **Phoneverse** is an **e-commerce web application** for buying premium pre-owned smartphones.
- Users can browse phones by brand and category with detailed product descriptions.
- The platform includes user registration and secure authentication.

▪ **PICGRAM**

Tools used: Python, Django, HTML, CSS, Bootstrap

Repository Link : github.com/unni-web/insta_clone

- Developed an **Instagram clone web application** using **Django** to replicate core social media functionalities.
- Implemented features such as user authentication and authorization using Django's **built-in auth** system.
- Utilized Django **ORM** for database operations and integrated media handling for image uploads.
- Emphasized clean architecture, modular code design, and a responsive interface using **HTML, CSS, Bootstrap**.

▪ **GALLERY VAULT**

Tools used: Python, Django, HTML, CSS

Repository Link : github.com/unni-web/Gallery_Vault

- Developed a **photo gallery web application** named Gallery Walt using **Django** to allow users to upload, organize, and view images efficiently.
- Implemented **user authentication** and **profile management** using Django's built-in auth system.
- Designed a clean interface where users can create albums, upload photos, and browse galleries by category or user.
- Utilized Django's **Model-View-Template (MVT)** architecture and **ORM** for managing image data and relationships effectively
